

Greener Regatta

2019

As you might imagine, a huge amount of waste can be generated over a regatta weekend, much of which is not environmentally friendly. Following on from our first year's successes, we are expanding our endeavours this year to run an even greener event.

Biodegradable products

All the items listed below are biodegradable and can therefore be disposed of responsibly in the general waste bins/bags.

- ~ Napkins ~ Paper cups (and lids) ~ Paper plates ~ Food bags ~
- ~ Plastic drinking straws ~ Wooden cutlery and stirrers ~

Re-usable mugs/water bottles

- ~ Bring your re-usable mug and purchase a hot drink half price ~
- ~ Fill up your re-usable bottle with water free of charge ~

Recycling

This year we are working with Cartwrights, a local waste disposal company, who operate a fully licensed waste transfer station and recycling centre. Recyclable materials are separated out and traded with manufacturers to be turned into new packaging. Any waste that cannot be re-used is sent for incineration as fuel for power plants. Cartwrights is a **Zero 2 Landfill** company, meaning *all waste is 100% recycled*.

Thank you for your support.
